## DAIKIN ANNOUNCES NEW ENERGY-EFFICIENT 15 SERIES RESIDENTIAL DUCTLESS SYSTEMS

**HOUSTON, May 26, 2015** – Daikin recently introduced a new 15 Series single-split ductless residential system. The new 15 Series wall mount system provides energy-efficient performance and enhanced indoor comfort control with Daikin’s legacy of energy-saving ductless systems.

Available in both heat pump and cooling only models, the 15 Series systems are pre-charged, designed to install quickly, and feature streamlined indoor units paired with compact outdoor units. Ideal for single room enhancements, spaces requiring additional heating or cooling, and additions up to 1,600 square feet, the 15 Series systems range from .75 to 2.0 ton cooling capacity and achieve 15 SEER cooling and 8.2 HSPF heating efficiency in all sizes.

“These systems are positioned to allow contractors to introduce more consumers to the benefits of energy-efficient ductless indoor comfort technology. They will be attractive for those needing a single zone comfort solution with our typical advanced technology features for ductless systems, including inverter-controlled compressors,” said John Clements, Director Ductless Products. The 15 Series are available now and are backed by Daikin’s 10-year parts limited warranty.\*

\*Complete warranty details are available from your local dealer or at [www.daikincomfort.com](http://www.daikincomfort.com). To receive the 10-year parts limited warranty, online registration must be completed within 60 days of installation. Online registration is not required in California or Quebec.
