

Daikin Offers Professional Development Hours Approved By Registered Continuing Education Program

HOUSTON, June 20, 2017 - Daikin North America LLC has been approved as an Authorized Provider of Professional Development Hours (PDH) by the Registered Continuing Education Program (RCEP). Who are they, you ask? Being an Approved Provider for RCEP means training sessions, lunch and learns, and other training venues conducted locally using the approved presentations will allow the attendee to earn PDH's that are valid in all 50 states.

From the RCEP website (www.rcep.net):

"The Registered Continuing Education Program (RCEP) is a nationwide portal for professional development education and record-keeping. Continuing education providers and education seekers (engineers, surveyors, and related Architecture/Engineering/Construction (A/E/C) industry professionals) can tap into a single, comprehensive, and convenient education management system. RCEP makes it easy to stay up-to-date with professional development requirements, find courses, and manage your continuing education credits - anytime, anywhere."

Daikin will enjoy significant benefits as a RCEP provider, including:

- Authorization to issue Professional Development Hours (PDHs) accepted by State Licensing Boards.
- Permission to publicize as a RCEP-approved continuing education provider.
- Confirm Daikin's commitment as a high-quality professional education provider.
- Advertise educational activities in the RCEP Master Calendar, which regularly receives a large number of visits by engineers, surveyors, and design professionals.
- Use the official Registered Continuing Education Program logo in promotional and course materials.
- Listing in the directory of RCEP Education Providers.
- Easily manage and track course participants' records online.
- Use the RCEP Continuing Education Management System to generate and issue certificates of completion in a standardized format.

Twelve Daikin training modules have been identified for earning PDH's. The seven training modules listed below are currently available, with five more coming soon:

| | |
|-----------|--|
| AC-1-PDH | VRF Product and Technology |
| AC-2-PDH | Application Considerations for Piping, Wiring & Condensate |
| AC-3-PDH | VRF Controls & Options |
| AC-4-PDH | VRF Design & Selection |
| AC-8-PDH | Codes & Standards Considerations |
| AC-9-PDH | VRF Design Optimization & Integration |
| AC-10-PDH | Methods to address Ventilation with VRF systems |

For more information about Daikin's PDH approved RCEP training, please contact your local Daikin distributor or representative
