

Daikin *ONE* Smart Thermostats:
Intelligent comfort. Smart Control.

DESIGNED FOR DAIKIN SYSTEMS.

The air today feels just right – amazing temperature, ideal humidity, and freshness – like right after it rains. But what makes it even better is that this ideal air is happening indoors. Inside your space. Inside, where we spend most of our time – working, playing, sleeping, living.

At Daikin, we're committed to making the air inside just as refreshing as the air outside. With Daikin efficiency, quality, and control, you can create your own ideal indoor environment. So, every day feels perfect, inside, and out.

Perfecting The Air We Share.

Daikin ONE+ smart thermostat

Daikin ONE touch smart thermostat

Daikin *ONE+* and Daikin *ONE Touch* deliver smart control, energy efficiency, and seamless integration with Daikin HVAC equipment.

INNOVATIVE CONTROL SOLUTIONS.

-  See indoor temperature, change set-points, or switch modes
-  Run the thermostat on a weekly schedule
-  Activate "away" mode to conserve energy
-  Monitor indoor air quality and change settings

Daikin *ONE+*

The Daikin *ONE+* smart thermostat provides more options than you can imagine. Control from the advanced touchscreen or the more familiar dial. Use the *SkyportHome* app to control your comfort from your sofa or even use your voice control with your smart home speaker. And energy-saving features like schedules, Away Mode, and Geo-Fencing make saving energy much more comfortable.

Daikin *ONE Touch*

A versatile thermostat that lets you control your comfort just the way you like it. The user-friendly smart touchscreen allows for customized settings, or you can control your Daikin HVAC system with the app on your phone. This Wi-Fi-enabled thermostat is also compatible with select smart speakers, allowing voice control to keep you cool or cozy.

Designed with quality components: Daikin ONE+ Smart Thermostat

- ① **The high-resolution color touch screen display** is protected by the same toughened glass used in smart phones.

A number of screen savers are available, including this analog clock.

- ② **The anodized aluminum bezel and dial** are precision manufactured. The surfaces have a fine bead blast with a warm hued anodized finish. The dial rotation is exceptionally smooth because it rests on a bearing assembly typically found in precision instruments. A switch behind the dial enables users to return to the home screen from any menu with a single tap.

Turning the dial changes the temperature set-point.

- ③ **An integrated Wi-Fi radio** connects to the internet (via a home router) to the cloud and onto the homeowner's mobile application. The *Skyport* cloud will also seamlessly integrate with open smart home architectures, including Amazon Alexa and Google Assistant, enabling consumers to effortlessly use features such as voice control.

The Daikin ONE Wireless RHT sensor is a perfect solution for those large areas where the temperature seems to vary throughout the day and needs to be averaged to maintain a more constant comfort level.

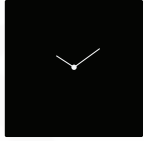

- ④ **A thin LED light bar** sits flush within the bottom surface and runs from edge to edge, delicately illuminating the wall beneath. Emitting a soft emotive glow, the light bar indicates the current system mode: red for heating, blue for cooling.

- ⑤ **Built-in bubble level** aids in a more professional installation.

Designed with quality components: Daikin ONE Touch Smart Thermostat

- ① **The high-resolution color touch screen display** is protected by the same toughened glass used in smart phones.

A number of screen savers are available, including this analog clock.

- ② **Simple, elegant industrial design, capacitive touchscreen user interface,** multi-language support: English, Spanish, French. Add Programmable 4-event schedule with adjustable hold function.

- ③ **An integrated Wi-Fi radio** connects to the internet (via a home router) to the cloud and onto the homeowner's mobile application. The *Skyport* cloud will also seamlessly integrate with open smart home architectures, including Amazon Alexa and Google Assistant, enabling consumers to effortlessly use features such as voice control.

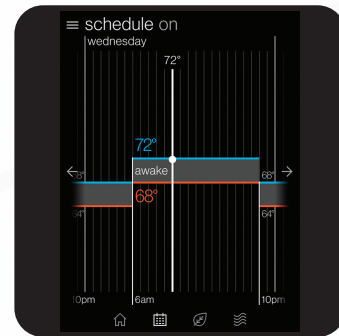

- ④ **Wi-Fi enabled smart thermostat** with iOS and Android app control. Voice control by Amazon Alexa and Google Assistant Control and comfort functions: Away mode, geo-fencing. Outdoor environment monitoring: outdoor temperature, outdoor humidity, and weather forecast when connected to Wi-Fi. Compatible with Daikin ONE home air monitor for IAQ visualization

- ⑤ **Built-in bubble level** aids in a more professional installation.

Everything you expect in a smart thermostat backed by quality, innovation, and support.

The **home screen** displays the current temperature, the current system mode, and adjustment slider, as well as icons leading to the top level screens.

The **schedule screen** displays upcoming set-point changes and scheduled times. It also offers access to edit mode, where you can adjust the schedule.

Daikin *ONE+* and *ONE Touch* smart thermostats are smart home climate controllers from a leading HVAC manufacturer. These cloud-connected controls work seamlessly with Daikin HVAC systems to regulate temperature, improve energy efficiency, and enhance comfort.

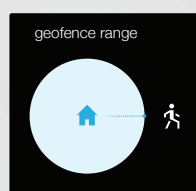

When paired with compatible Daikin systems, select models also offer advanced humidity control and indoor air quality monitoring.

Daikin smart thermostats support straightforward temperature adjustment, automatic setting changes through a programmable schedule, and energy-saving modes that can be activated manually or through geo-fencing using the mobile app. When enabled, the app can recognize when the home is unoccupied and adjust settings to reduce energy use.

Designed for use with Daikin HVAC systems, select models also support additional comfort management features such as humidity control and

indoor air quality visibility when paired with compatible equipment.

Some traditional consumer smart thermostats function primarily as basic on/off controls, relying on standard 24-volt signals and offering limited interaction with HVAC systems. Daikin smart thermostats are designed to integrate with Daikin equipment and, depending on the model and system configuration, can send and receive operational information to support system control and monitoring.

With the mobile app, geo-fencing will automatically switch to energy savings mode.

¹Available for select systems.

Good View Example:

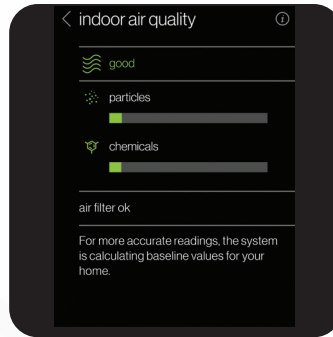

The **away screen** displays energy saving set-points. Energy saving can be invoked manually or automatically when the mobile app recognizes everyone is away.

The **air quality screen*** displays indoor air quality levels when a Daikin **ONE** home air monitor is connected. Outdoor air quality and weather will be displayed when connected to the internet and thermostat added in the mobile app under home location.

Example of Additional Details:

*Actual screen may vary for different indoor unit models. The Daikin **ONE** home air monitor only works with ducted units.

Daikin smart thermostats are designed to accommodate different user needs and system applications.

For routine use, homeowners can adjust temperature settings directly from the thermostat interface. The current temperature and set-point are displayed, and commonly used controls are accessible from the primary screens. Features such as scheduled temperature changes, energy-saving away settings, and air quality information (when supported by the system) can be accessed through the main screens. Most users interact primarily with these screens for daily temperature management.

Additional options are available through the settings menus for users who want to adjust scheduling, energy-related preferences, or system behavior, depending on the thermostat model and compatible HVAC equipment.

Installation and advanced configuration settings are available for contractors. These settings support system setup and operation and are separated from standard user controls.

In addition to interaction at the thermostat, Daikin **ONE+** and **ONE** Touch smart thermostats support voice control through Amazon Alexa and Google Assistant. The *SkyportHome* mobile app, available for iOS and Android devices, provides remote access to system information and controls.

Control is available through popular voice-activated speakers.

The One for Connectivity

Compatible with a Broad Range of Daikin Systems

- » Communicating and conventional Daikin equipment
- » Single and multi-zone, ducted, and select VRV applications*
- » Model compatibility varies by thermostat type

SINGLE AND MULTI-ZONE
CMXV, FYXC, FTXV, CTXV, FTKF_B,
FVXV, FTXF_B, FTXO, FTXM

VRV
FXAA, FXFA, FXSA,
FXMA, FXTA, FXZA
SKYAIR
FAA, FTA, FBA, FCA

AIR CONDITIONERS
DC9VS, DC7TC, DC6VS

HEAT PUMPS
DH9VS, DH7TC,
DH7VS, DH6VS

GAS FURNACES
DR_MC, DR_TC, DR_SC-U,
DD_MC, DD_TC, DD_SC-U

AIR HANDLERS
DFVE, DMVE, DMVT,
MBVC, MBVK

Some systems require additional communication adapters.
Compatibility varies by thermostat model and system configuration.
Refer to product submittals for details.

* The Sarara drying function of the QUATERNITY units is not supported with Daikin ONE+ smart thermostat, but the dehumidification function of the Daikin ONE+ can be used with the QUATERNITY indoor units.

Additional Features and Specifications

THE DAIKIN *ONE+* AND *ONE* TOUCH SMARTTHERMOSTATS ARE BACKED BY AN OUTSTANDING 12-YEAR¹ LIMITED WARRANTY*

* Complete warranty available from your local dealer or at www.daikincomfort.com. To receive the 12-Year Limited¹ Warranty, online registration must be completed within 60 days of installation. The duration of warranty coverage may depend on the state in which you reside. Some states and provinces do not allow warranty coverage to be conditioned on registration. For a list of states and provinces that do not allow warranty coverage to be conditioned on registration, please visit www.daikincomfort.com/warranty-information or, to request a paper copy of this information, please call us at 1-855-502-3903. Other limitations and exclusions apply, refer to complete warranty details for full list of limitations and exclusions.

¹ 12-Year Limited Warranty is available for owner-occupied residences only. For multi-family and/or commercial applications, the warranty period is 5-years.

Daikin ONE Home Air Monitor

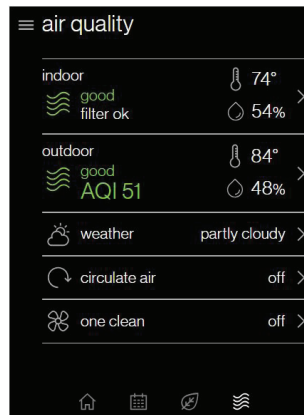

The Daikin ONE Home Air Monitor helps monitor the air quality within the whole home. Working with the Daikin ONE ecosystem¹, it detects, visualizes, and supports action to help you improve the indoor air quality within your space.

Available for select systems², the Daikin ONE Home Air Monitor will monitor and learn baseline air quality in the home, over 7 days, then provide a rolling 7-day average baseline. When potential particulate and/or chemical events occur outside of this average baseline, the system will detect the potential deviation and send alerts to the ONE+ or ONE touch smart thermostat.

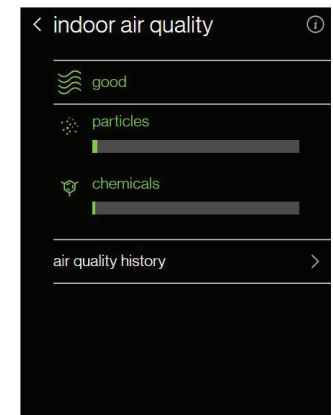

- » From the ONE+ or ONE touch smart thermostat, visualize the estimated air quality in real-time directly on the thermostat or through the smartphone app.
- » Indoor Air Quality Event Monitor – from this option, see when particles or chemicals are elevated compared to the 7-day baseline to help to understand and control your air. The readings will include:
 - **Green** - typical concentrations in the home
 - **Yellow** - elevated concentrations in the home
 - **Orange** - very elevated concentrations in the home

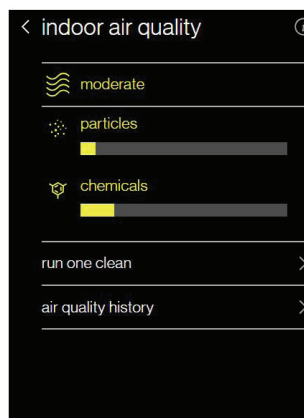

AIR QUALITY

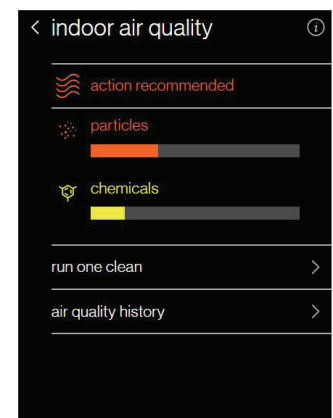

GREEN READING

YELLOW READING

ORANGE READING

¹Components sold separately.

²The Daikin ONE home air monitor only works with ducted units.

³Actual screen may vary for different indoor unit models.

A full-featured mobile companion app is available for Android and iOS.
